New USB Interface Lead

Morley-IAS is pleased to announce the release of a new USB interface lead.

Purpose of Release

This lead is compatible with DX and ZX panels and allows users to connect laptop or desktop PC's to Morley-IAS Fire Alarm Control Panels. The built in isolation allows any PC with USB connection to be connected to a Morley-IAS panel without risk of causing an earth fault. It also protects the PC and panel from possible damage due to earth circulation currents if an earth fault exists on the panel.

It is supplied complete with adaptor cable to suit Morley-IAS panels, interface unit, 1.5m USB lead, and driver installation disk.

This new lead replaces the older RS232 transfer lead Part-no 795-080 and eliminates the need for the USB to RS232 convertor AMC-232USB01.
